(404) 641 2344 | brendan.w.hunt@gmail.com

EDUCATION

The Pennsylvania State University
College of Information Sciences and Technology
Bachelor of Science in Cybersecurity Analytics and Operations

University Park, PA
May 2026
GPA: 3.4

TECHNICAL SKILLS

Operating Systems: Linux, Windows, MacOS
Programming and Scripting: Java, R, Python, Bash, SQL, Powershell
Virtualization and Containers: Proxmox, VMware, Docker, Troubleshooting/Resource Management
Cybersecurity: Malware Analysis, Risk management, Incident reporting, Forensics, Network Security
Networking: Firewalls, intrusion detection/prevention systems (IDS/IPS), access control lists (ACLs), C-Cure

WORK EXPERIENCE

Nightwing (Formerly Raytheon Technologies), Security Intern *May 2025 – August 2025*

- Contributed to Industrial Security initiatives through facility checklists, site assessments, and investigations.
- Supported Physical Security operations, managing access controls, security device installations, and ISO 27001 related audit and monitoring activities. Performed on-site audits for 3rd party companies and the U.S. government.
- Assisted with Cybersecurity efforts, including audit support and exposure to SCAP/Nessus scanning.

Penn State IT, Endpoint Management Specialist *October 2022 – September 2025*

- Part-time, paid position among a select group of students to provide IT help desk support across a range of issues across various OS, platforms, and supported hardware.
- Decommissioned and reconfigured desktop environments.
- Skilled in ServiceNow IT ticketing system, including creating, triaging, and assigning tickets.

PROJECT WORK EXPERIENCE

Secure Self-Hosted Infrastructure Lab

- Deployed Pi-Hole DNS ad-blocker and Vaultwarden password manager on an Ubuntu VM using Docker, Cloudflare Tunnel for secure HTTPS exposure, and Tailscale VPN for zero-trust remote access—blocked 50k+ ads/month across home network and secured over 400+ credentials.
- Hardened server with various Iptables rules, SSH key authentication, and automated rsync/cron backups—reduced attack surface and implemented the 3-2-1 backup rule.
- Integrated Telegram API bot for real-time alerts and incident notifications using python-telegram-bot.

Python Telegram Bot for Infrastructure Alerts

- Developed a Telegram bot using Telegrams API to deliver real-time notifications for self-hosted services.
- Integrated bot with Docker container monitoring to alert on uptime issues, CPU/Memory usage, and security events.

Java Chatbot Project

- Developed a functional chatbot that interprets user queries to suggest food recipes.
- Integrated an algorithmic function to convert sentences into tokens, then rank them based on pre-defined categories.
- Used the Swing framework to create a sleek and user-friendly interface.

ACTIVITIES

Competitive Cybersecurity Organization, Member *August 2022 - Present*

- Attended weekly meetings to further advance my knowledge in cybersecurity and participated in CTF challenges.

Chi Phi Fraternity, Member *January 2023 - Present*

- Raised over \$130,000 dollars as a collective towards the Four Diamonds organization for pediatric cancer research.
- Participated in fundraising efforts, event planning, and community outreach.

Eagle Scout Award, Boy Scouts of America *March 2022*

- Designed and built a disc golf course and set of stairs for the First United Methodist Church in Alpharetta, GA.
- Managed a team of 15+ adults and scout volunteers over two days to build the course and stairs.
